Driven by curiosity and innovation, I am a second-year AI/ML student with a passion for learning and applying cutting-edge technologies. Eager to immerse myself in the dynamic world of artificial intelligence and machine learning, I am excited to contribute fresh ideas and collaborate on impactful projects. With a strong foundation in AI principles and a fast learner mindset, I am ready to take on new challenges, continually expanding my knowledge and skills in this ever-evolving field

SKILLS

Languages : Python, SQL, Html

IDEs : Visual Studio Code

Others : NLP, opencv

FrameWorks : Django

PROJECTS

Conversational Image Recognition Chatbot (Hackathon Project)

September 2024

Developed a conversational chatbot using Django, NLP, and OpenCV for real-time image recognition in a 24-hour hackathon. The solution enabled users to upload images and receive automated responses with detailed recognition results. Leveraged NLP for dialogue management, providing seamless user interaction.
